Part 7 Confirm and discuss the subsequent control measures implemented relevant to the Life Saving Rule

Good comms. No personnel on TMS / working on ROV when energizing IPDS / IPA; ground straps connected. Announce HPU energizing prior to start-up. Remove nonessential personnel, erect barricades, deck personnel to keep safe distance.

Deck personnel to visually verify all thrusters are clear of tools and foreign objects before thruster checks. Personnel always clear of manipulators during testing; manipulator activity is announced prior to moving. De-select flight on GUI and confirm with technician on deck that thrusters are not rotating.

Oil absorbent pads on hand. Keep an eye on HPU motor temperature.

Part 8 TBT Discussion Topics / Notes (to include reinforcement of ACT for Safety and Stop Work Authority)

Pre / Post dive checks of system to check for leaks in hydraulics and electrical issues before or after a dive. Safety Principle: 'STOP THE JOB' if safety is compromised or you see something going wrong.
