

Report No.	DOUS-TBT-100	Project No.	
Date		Project Name	
Vessel / Spread		Offshore Manager	

Copies of the completed Toolbox Talks shall be sent to HSEQS Department upon request.

The Toolbox Talk is a discussion meeting, hence it shall be delivered verbally by a TBT Leader.

Part 1 Project Operational Overview (Tick and discuss the area of operations as applicable)

1	Mobilisation / demobilisation	☐	9	Plough Operations / Launch & Recovery	☐
2	Vessel Transit Operations	☐	10	Trencher Operations / Launch & Recovery	☐
3	Platform 500m Zone Entry	☐	11	ROV Operations / Launch & Recovery	☐
4	Lifts – Deck	☐	12	Simultaneous Operations	☐
5	Lifts – Subsea	☐	13	Abandonment of Asset(s)	☐
6	Deck Operations	☐	14	Recovery of Asset(s)	☐
7	Cable Working Equipment	☐	15	Equipment Maintenance	☒
8	Equipment / Procedure Trials	☐	16	Other:	☐

Part 2 Specific Task (Identify what the task is that is to be performed)

System Maintenance.

Part 3 HSE Considerations & Requirements (Tick and discuss as applicable)

1	PPE	☒	14	Environmental Requirements	☒
2	Working at Height	☐	15	Over side Working	☐
3	Risk Assessment / JSA / Take 2	☐	16	Life Saving & Fire Fighting Equipment	☒
4	Lifting Operations & Lift Plans	☐	17	Boat Transfers	☐
5	Manual Handling	☒	18	First Aid – Medical Support	☐
6	Slips, Trips & Falls	☐	19	Housekeeping	☐
7	Permit to Work	☐	20	Noise / Vibration	☐
8	Electrical Work & Precautions	☐	21	Confined Spaces	☐
9	Hot Work	☐	22	COSHH	☐
10	Safety & Warning Signs	☐	23	Stored Pressure Systems	☐
11	Rescue Equipment/Plan	☐	24	HV Electrical Work	☐
12	Communication Protocols	☐	25	Spill Prevention / Containment	☐
13	Dropped Objects	☐	26	Other:	☐

Part 4 Supporting Documents – List applicable documents discussed and reviewed during TBT
(Method Statements, Task Plans, Lift Plans, COSHH RA, Drawing, MOC's, RA's/ SJA's, Storyboards, etc.)

Part 5 Emergency Arrangements

Discuss / list specific Rescue Plans, Contingency Plans as applicable

Name and contact of the assigned Medic / First Aider

Part 6 Life Saving Rules (Identify and tick applicable rules)

 Bypassing Safety Controls ☐	 Confined Space ☐	 Driving ☐	 Energy Isolation ☐	 Hot Work ☐	 Line of Fire ☐	 Safe Mechanical Lifting ☐	 Work Authorisation ☐	 Working at Height ☐
--	---	--	---	---	---	--	---	--

Part 7 Confirm and discuss the subsequent control measures implemented relevant to the Life Saving Rule

Avoid using fast, jerking motions when lifting.
 Avoid bending and twisting at the same time.
 Keep the load close to your body.
 Teamwork! If the load is too heavy, two persons should carry the load.
 Take stretch breaks between long standing or sitting periods.

Part 8 TBT Discussion Topics / Notes (to include reinforcement of ACT for Safety and Stop Work Authority)

Back Safety
 "OUCH! Why did I try to lift that much weight on my own?" Did you ever ponder those words after you hoisted something heavy, or lifted from an awkward position? These incidents are well known causes of back strain, but you might not have considered other "underlying" factors that lead to back injury. Several conditions influence your "back health."
 The cause of most back problems is poor posture, loss of flexibility, stressful living/working habits and above all, a general decline in physical fitness. Surprised? You shouldn't be. When you "let yourself go," (and most of us do with age) the first thing to go can be back strength. Along with correct lifting techniques, we should also work on our overall physical condition.
 Nutrition--is an important key to staying physically fit! As we grow older, our metabolism slows down. To counteract this natural event, we have to eat the right types of food-and not too much of it-or the pounds come on quickly! Now, what does nutrition have to do with a healthy back? For one thing, a healthy back is correctly balanced on your spine. With a "sway" back, that balance is lost-and those darned potbellies cause sway backs. Carrying around excess weight puts tremendous strain on back tissues, so lifting even a small extra load may cause an injury.
 Exercise--plays an important role as well. A form of exercise as simple as walking 30 minutes a day can raise your heart rate and burn enough calories to help keep you lean. Flexibility is another condition that changes as we grow older, if we don't work to retain it. It's true, as they say-"Use it or Lose it!" Without flexibility, we lose our body's full range of motion. Then, when a sudden, physical demand takes a muscle or joint further than it's used to, the risk of injury is high. You can do stretching exercises every morning to keep yourself flexible and ready for the physical demands of work. After all, don't athletes warm up before a game to prevent injury?
 Fixed positions--not moving enough--can also cause back problems. Staying in a fixed position for too long can lead to muscle spasms. We feel it as stiffness, but by the time discomfort from "static" muscle contractions is experienced, low level tissue damage has begun. Take stretch breaks between long standing or sitting periods to improve circulation and prevent back strain.
 Poor body mechanics and bad lifting habits usually "trigger" a back injury-and are more likely to do so if overall physical condition is poor. Remember these techniques to help escape injury:
 Avoid using fast, jerking motions when lifting.
 Avoid bending and twisting at the same time.
 Avoid handling a load too far away! Keep the load close to your body.
 Teamwork! If the load is too heavy, two persons should carry the load.
 Emotional Stress leads to mental distraction, so that things other than proper body mechanics are on your mind. Stress and back pain seem to go together. Low back pain has been called "a tension headache that slipped."
 Solving our personal problems isn't always easy to do, but it often takes away back pain and helps prevent repeated injuries.
 In Conclusion: Improper lifting isn't the only thing that causes back injuries. People who do not also stay in good physical and mental condition are at high risk for back problems.
 It's Up To You--Take Good Care Of Your Body and Save Your Back!
 Safety Principle: 'STOP THE JOB' if safety is compromised or you see something going wrong.

Part 9 Identify any actions from TBT and assign Responsible Person and timescale

--

Part 10 TBT Attendees

Print Name	Sign	Print Name	Sign	Print Name	Sign
TBT Leader Name		TBT Leader Signature		Date	Time
					0000-2400

Part 11 Confirmation from TBT Leader

Have all relevant persons involved in / affected by the task attended the TBT?	☒ Yes	☐ No
Have specific roles and responsibilities required for the task been adequately communicated and understood?	☒ Yes	☐ No
Are all control measures understood by those involved and suitably implemented?	☒ Yes	☐ No
