

Report No.	DOUS-TBT-103	Project No.	
Date		Project Name	
Vessel / Spread		Offshore Manager	

Copies of the completed Toolbox Talks shall be sent to HSEQS Department upon request.

The Toolbox Talk is a discussion meeting, hence it shall be delivered verbally by a TBT Leader.

Part 1 Project Operational Overview (Tick and discuss the area of operations as applicable)

1	Mobilisation / demobilisation	☐	9	Plough Operations / Launch & Recovery	☐
2	Vessel Transit Operations	☐	10	Trencher Operations / Launch & Recovery	☐
3	Platform 500m Zone Entry	☐	11	ROV Operations / Launch & Recovery	☐
4	Lifts – Deck	☐	12	Simultaneous Operations	☐
5	Lifts – Subsea	☐	13	Abandonment of Asset(s)	☐
6	Deck Operations	☐	14	Recovery of Asset(s)	☐
7	Cable Working Equipment	☐	15	Equipment Maintenance	☒
8	Equipment / Procedure Trials	☐	16	Other:	☐

Part 2 Specific Task (Identify what the task is that is to be performed)

General Maintenance.

Part 3 HSE Considerations & Requirements (Tick and discuss as applicable)

1	PPE	☐	14	Environmental Requirements	☒
2	Working at Height	☐	15	Over side Working	☐
3	Risk Assessment / JSA / Take 2	☐	16	Life Saving & Fire Fighting Equipment	☒
4	Lifting Operations & Lift Plans	☐	17	Boat Transfers	☐
5	Manual Handling	☐	18	First Aid – Medical Support	☐
6	Slips, Trips & Falls	☐	19	Housekeeping	☐
7	Permit to Work	☒	20	Noise / Vibration	☐
8	Electrical Work & Precautions	☐	21	Confined Spaces	☐
9	Hot Work	☐	22	COSHH	☐
10	Safety & Warning Signs	☐	23	Stored Pressure Systems	☐
11	Rescue Equipment/Plan	☐	24	HV Electrical Work	☐
12	Communication Protocols	☒	25	Spill Prevention / Containment	☐
13	Dropped Objects	☐	26	Other: Fatigue / Concentration	☒

Part 4 Supporting Documents – List applicable documents discussed and reviewed during TBT
(Method Statements, Task Plans, Lift Plans, COSHH RA, Drawing, MOC's, RA's/ SJA's, Storyboards, etc.)

Part 5 Emergency Arrangements

Discuss / list specific Rescue Plans, Contingency Plans as applicable

Sound the fire alarm and follow company procedures on responding to fires.

If the fire gets too large or out of control, evacuate immediately.

Name and contact of the assigned Medic / First Aider

Part 6 Life Saving Rules (Identify and tick applicable rules)

 Bypassing Safety Controls ☐	 Confined Space ☐	 Driving ☐	 Energy Isolation ☐	 Hot Work ☐	 Line of Fire ☐	 Safe Mechanical Lifting ☐	 Work Authorisation ☐	 Working at Height ☐
--	---	--	---	---	---	--	---	--

Part 7 Confirm and discuss the subsequent control measures implemented relevant to the Life Saving Rule

Only attempt to fight a fire if you know the type of combustible material burning, have been trained to use the extinguisher, and the fire is still in the incipient (beginning) stage.

Remember P-A-S-S: Pull, Aim, Squeeze, Sweep.

Good housekeeping, proper storage procedures and safe work practices to prevent fires.

Part 8 TBT Discussion Topics / Notes (to include reinforcement of ACT for Safety and Stop Work Authority)**Fire Extinguishers**

In the event of a fire, the correct use of a portable fire extinguisher could mean the difference between suffering a minor loss or a major one. Portable fire extinguishers, if used properly, can make that difference. But there are several things to consider in using fire extinguishers. For instance, you must know the class of fire involved and the correct type of fire extinguisher to use.

CLASSES OF FIRES AND FIRE EXTINGUISHERS:

Class A Involves ordinary combustibles such as paper, wood, cloth, rubber or plastics. The common extinguishing media is water or dry chemical.

Class B Flammable liquids, grease or gases are covered under this category.

Common extinguishing media are foam, carbon dioxide or dry chemical.

Class C Live electrical fires are class C fires. CO2 or dry chemical extinguishers should be used. However, the actual burning product may be class A items.

Class D Burning materials include combustible metals such as magnesium and sodium. Special extinguishing agents, approved by recognized testing laboratories, are needed when working with these metals.

RESPONDING TO FIRES:

Sound the fire alarm and call the local fire department immediately if a fire breaks out, Follow your company's procedures on responding to fires. But attempt to fight the fire only if, (1) you know the type of combustible material burning, (2) you have been trained to use the fire extinguisher correctly, and (3) if the fire is still in the incipient (beginning) stage. If the fire gets too large or out of control, evacuate immediately.

REMEMBER P-A-S-S WHEN USING AN EXTINGUISHER:

P - Pull. Pull the locking pin before using the fire extinguisher.

A - Aim. Aim the fire extinguisher at the base of the fire. Not at the flames or smoke.

S - Squeeze. Squeeze the lever of the fire extinguisher to operate and discharge.

S - Sweep. Sweep the fire extinguisher back and forth at the base of the fire to extinguish.

(Most extinguishers will only allow about 10-seconds of extinguishing media.)

Prevention is the key when it comes to firefighting. Good housekeeping, proper storage procedures and safe work practices will go a long way toward reducing the likelihood that a fire will destroy valuable property or injure either you or a fellow employee.

Discussion Questions:

What is your company's policy on sounding an alarm and contacting the fire department?

What kinds of flammables are most likely to create a fire danger at your jobsite?

What type of fire extinguisher should be used on those flammables or combustibles?

Safety Principle: 'STOP THE JOB' if safety is compromised or you see something going wrong.

Part 9 Identify any actions from TBT and assign Responsible Person and timescale

--

Part 10 TBT Attendees					
Print Name	Sign	Print Name	Sign	Print Name	Sign
TBT Leader Name		TBT Leader Signature		Position	Date
					Time
					0000-2400

Part 11 Confirmation from TBT Leader		
Have all relevant persons involved in / affected by the task attended the TBT?	☒ Yes	☐ No
Have specific roles and responsibilities required for the task been adequately communicated and understood?	☒ Yes	☐ No
Are all control measures understood by those involved and suitably implemented?	☒ Yes	☐ No
