Part 8 TBT Discussion Topics / Notes (to include reinforcement of ACT for Safety and Stop Work Authority)**Hand Washing**

Before Meals: It's important to have clean hands before you sit down to eat. Washing with hot water and soap will clean your hands so that they do not carry bacteria to your family and friends as you pass the bread!

After Restroom Use: To ensure you don't carry fecal or other bacteria to other parts of the body or to other individuals, you will want to wash your hands after every time you use the restroom. Make sure you wash your hands immediately afterward—don't touch your nose or mouth to avoid unnecessary illness.

Before Preparing Food: Washing your hands before you prepare food is very important to ensure you don't spread bacteria to your food. Wash them with hot, soapy water for at least 2 minutes before you begin working with food, particularly poultry or red meat. This will keep your food free from bacteria, and will ensure your food is healthy to serve once it's cooked!

After Preparing Food: Again, washing your hands for at least 2 minutes with hot, soapy water after you have prepared food (and before serving) will ensure you don't carry bacteria with you, thus potentially infecting you or others. Good hygienic habits are easy to begin and maintain. Starting with a few of these ideas will help you start on your way to developing good hygiene for both you and your family

Safety Principle: 'STOP THE JOB' if safety is compromised or you see something going wrong.

Part 9 Identify any actions from TBT and assign Responsible Person and timescale
