

Report No.	DOUS-TBT-107	Project No.	
Date		Project Name	
Vessel / Spread		Offshore Manager	

Copies of the completed Toolbox Talks shall be sent to HSEQS Department upon request.

The Toolbox Talk is a discussion meeting, hence it shall be delivered verbally by a TBT Leader.

Part 1 Project Operational Overview (Tick and discuss the area of operations as applicable)

1	Mobilisation / demobilisation	☐	9	Plough Operations / Launch & Recovery	☐
2	Vessel Transit Operations	☐	10	Trencher Operations / Launch & Recovery	☐
3	Platform 500m Zone Entry	☐	11	ROV Operations / Launch & Recovery	☐
4	Lifts – Deck	☐	12	Simultaneous Operations	☐
5	Lifts – Subsea	☐	13	Abandonment of Asset(s)	☐
6	Deck Operations	☐	14	Recovery of Asset(s)	☐
7	Cable Working Equipment	☐	15	Equipment Maintenance	☐
8	Equipment / Procedure Trials	☐	16	Other:	☐

Part 2 Specific Task (Identify what the task is that is to be performed)

Housekeeping / System Training.

Part 3 HSE Considerations & Requirements (Tick and discuss as applicable)

1	PPE	☒	14	Environmental Requirements	☐
2	Working at Height	☐	15	Over side Working	☐
3	Risk Assessment / JSA / Take 2	☐	16	Life Saving & Fire Fighting Equipment	☒
4	Lifting Operations & Lift Plans	☐	17	Boat Transfers	☐
5	Manual Handling	☐	18	First Aid – Medical Support	☒
6	Slips, Trips & Falls	☐	19	Housekeeping	☐
7	Permit to Work	☐	20	Noise / Vibration	☐
8	Electrical Work & Precautions	☐	21	Confined Spaces	☐
9	Hot Work	☐	22	COSHH	☐
10	Safety & Warning Signs	☐	23	Stored Pressure Systems	☐
11	Rescue Equipment/Plan	☐	24	HV Electrical Work	☐
12	Communication Protocols	☐	25	Spill Prevention / Containment	☐
13	Dropped Objects	☐	26	Other:	☐

Part 4 Supporting Documents – List applicable documents discussed and reviewed during TBT
(Method Statements, Task Plans, Lift Plans, COSHH RA, Drawing, MOC's, RA's/ SJA's, Storyboards, etc.)

Part 5 Emergency Arrangements

Discuss / list specific Rescue Plans, Contingency Plans as applicable

Have someone call for medical help.

Do ABC (airways, breathing, circulation) evaluation. Begin CPR if breathing and circulation have ceased and continue until vital signs have been restored.

Name and contact of the assigned Medic / First Aider

Part 6 Life Saving Rules (Identify and tick applicable rules)

 Bypassing Safety Controls ☐	 Confined Space ☐	 Driving ☐	 Energy Isolation ☐	 Hot Work ☐	 Line of Fire ☐	 Safe Mechanical Lifting ☐	 Work Authorisation ☐	 Working at Height ☐
---	---	--	---	---	---	---	--	---

Part 7 Confirm and discuss the subsequent control measures implemented relevant to the Life Saving Rule**Part 8 TBT Discussion Topics / Notes (to include reinforcement of ACT for Safety and Stop Work Authority)****Heart Attacks**

Most heart attacks are the end result of coronary heart disease, a condition that clogs coronary arteries with fatty, calcified plaques. As blood flow is gradually impeded, the body may compensate by growing a network of collateral arteries to circumvent blockages; the presence of collateral vessels may greatly reduce the amount of heart muscle damaged by a heart attack. In the early 1980s, researchers confirmed that the precipitating cause of nearly all heart attacks is not the obstructive plaque itself, but the sudden formation of a blood clot on top of plaque that cuts off blood flow in an already narrowed vessel.

For Heart attack victims, use the following procedure:

Do ABC (airways, breathing, circulation) evaluation, Begin CPR if breathing and circulation have ceased.

Continue CPR until the vital signs have been restored

If breathing and circulation are present, keep calm and reassure the victim

Loosen the clothing and help the victim get into a comfortable position (halfway between lying and sitting)

DO NOT carry or lift the victim more than necessary

Have someone call for medical help

DO NOT give the victim any liquids without a doctor's advice

Signals of a Heart Attack:

Persistent chest discomfort lasting more than 3 to 5 minutes, Persistent chest discomfort that goes away and comes back, Discomfort, pain or pressure in either arm, back, and stomach, Discomfort, pain or pressure that spreads to the shoulder, arm, neck or jaw. Dizziness, light-headedness, or loss of consciousness. Trouble breathing including noisy breathing, shortness of breath and breathing that is faster than normal. Nausea, Pale or ashen looking skin. And sweating - face may be moist or person may be sweating profusely.

Safety Principle: 'STOP THE JOB' if safety is compromised or you see something going wrong.

Part 9 Identify any actions from TBT and assign Responsible Person and timescale

Part 10 TBT Attendees					
Print Name	Sign	Print Name	Sign	Print Name	Sign
TBT Leader Name		TBT Leader Signature		Position	Date
					0000-2400

Part 11 Confirmation from TBT Leader		
Have all relevant persons involved in / affected by the task attended the TBT?	☒ Yes	☐ No
Have specific roles and responsibilities required for the task been adequately communicated and understood?	☒ Yes	☐ No
Are all control measures understood by those involved and suitably implemented?	☒ Yes	☐ No
